when you are marketing a paid onlyfans page you are attempting to entice people that what they are seeing now is nothing compared to what they will get behind your onlyfans paywall this is not the case when it comes to a free page because you really don t need to convince anyone of anything other than they like how you look or what you offer the main thing is to tell them what your free page isn t because so many people use their free onyfans pages to spam other creators links and their worst content

let it be known in your advertising what this page contains if as i mentioned above you re setting up a funnel let them know that there are 3 videos on the page free that can be found nowhere else of you what is on your page is exclusive and certainly worth checking out you want to make sure they know that this content can t be found on instagram tiktok etc and isn t just a rehash of something they have seen before what you ve created is exciting and new and slightly out of your usual comfort zone and they can only be found on onlyfans not only that it s totally free and you made this just because you love your fans so much

there are some people who just go from place to place getting whatever is free in life consuming it and move on you can t waste your time thinking about these people or trying to convert them you are not setting these sales traps for them they should be ignored it costs you nothing to have them on your page so don t worry about it

onlyfans has content creators across various niches these include creators who do fitness modeling regular modeling cosplay adult modeling and films cam girls musicians and so many others contrary to popular belief onlyfans is not a porn site despite the fact it allows adult content

if we browse the platform we will get many accounts that we can continue without having to pay anything we will also find accounts that will let us subscribe at 0 cost but to finish the subscription we must have previously registered a payment method on the platform

plus even if they did work you re essentially stealing and not from a large company you re primarily stealing from independent creators who work hard to earn their living it s not moral to even try if you want to see someone s content you should pay for that privilege

right now all you are trying to do is sell them on the concept that you are appealing to them in some way and they want to see more of you this is typically how reddit onlyfans promotion works on subreddits a person sees your picture and they desire to see more so they look over your reddit profile in hopes of seeing as much of a free sample of your content as possible they only need to like you enough to click on your reddit profile and that is all someone will need to be enticed by you to click on and follow your free onlyfans link remember they are going to consume your free content on some platform not in your control either twitter or reddit perhaps even instagram on these platforms your ability to make money is zero so why not get them to come into a page where you can actually get them to spend money on you
